The attached sketch of a new Soviet anti-aircraft shell ELJ*2.4 is on a scale of 1:1, that is, its actual size. This anti-aircraft shell is equipped with automatic control so that the shell is accurately steered to the correct target under its own power. For this purpose gyroscopes are installed. The shell is said to have to reach a height of 30,000 m in order to attain unconditional accuracy of fire.

ILLEGIB

* As received; there is no J in the cyrillic alphabet.
